The 7th edition of the IWA Resource Recovery Conference (IWA RR2027) will be held in Santiago de Compostela, Spain, **from 7 to 11 June 2027**, as the leading **World Congress on Resource Recovery and Circular Economy**, with a predominant focus on the recovery of resources from **liquid waste streams** — particularly wastewater and water-related systems — while also addressing broader circular economy strategies beyond the water sector.

We expect **around 600 participants from more than 50 countries**, bringing together a truly international community of researchers, utilities, technology providers, industry leaders, policymakers, and investors committed to accelerating the transition toward circular and climate-resilient systems.

Under the guiding theme **“Bringing circular value chains to life”**, IWA RR2027 will emphasize translating scientific excellence into scalable, market-ready solutions: nutrient recovery, carbon-to-products, water reuse, critical materials, energy recovery, innovative business models, regulatory frameworks, and governance approaches that enable real-world implementation. The conference uniquely connects the full innovation chain — from laboratory research to full-scale application and market uptake.

Previous editions of the conference were successfully held in **Ghent (Belgium), New York (USA), Venice (Italy), Istanbul (Türkiye), Shenzhen (China), and Leeuwarden (The Netherlands)**, consolidating its position as the reference international forum in resource recovery from water. In 2027, Santiago de Compostela will host this prestigious World Congress for the first time in Spain.

We are proud to announce that the **Consellería de Medio Ambiente e Cambio Climático da Xunta de Galicia** will serve as the **Diamond Sponsor**, reflecting strong institutional commitment to sustainability, circular bioeconomy, and climate action.

By becoming a sponsor, your organisation will:

- Gain direct access to a highly specialised international audience of decision-makers, utilities, and innovators.
- Showcase technologies, products, and services at the forefront of circular water and resource recovery solutions.
- Strengthen brand visibility through exhibition space, plenary acknowledgements, logo presence across all conference materials, and digital promotion.
- Engage in high-level networking and strategic partnerships shaping future markets, regulation, and investment in circular systems.
- Position your company as a key actor in the global transition toward resource-positive and climate-resilient infrastructures.

We warmly invite you to join us in Santiago de Compostela and become a strategic partner of the 7th IWA Resource Recovery Conference 2027 (IWA RR2027)

Sponsorship packages

	Platinum (2)	Gold (3)	Silver (5)	Exhibitors (5)
	15.000 €	10.000 €	5.000 €	2.000 €
